Gull confirms fuel supplies unaffected by Pipeline outage

Auckland, NZ - Gull confirmed today that its fuel supply was unaffected by the Ruakaka pipeline outage.

Dave Bodger, Gull General Manager said, "We remain operating as per normal. We do not utilise the pipeline in our distribution channels and our petrol and diesel supplies at our Mount Maunganui terminal are unaffected by the issue with the Marsden Point Refinery to Auckland fuel pipeline. We have ample stocks on hand and have made offers to each of our competitors of supply, storage, shipping, and repair equipment to assist the industry with this disruption."
